

**NEW
LINE**
SERIES

The NEW LINE SERIES was designed to give utmost freedom for individual creativity to the bass player. According to this aim we now proudly introduce a range of products, which will open new dimensions to bass players. This new series accomplishes the former production line of GREEN AUDIO. A completely new design and manyfold technical innovations let this series be a milestone in the development of top-quality bass equipment. The development was especially concentrated on the urgent demand of modern bass players for multi-channel systems and compactness. Carefully designed foamed GIGBAGS are available for all models of the NEW LINE SERIES.

NL 1

The basic model of the NEW LINE cabinets with one 15 inch loudspeaker impresses especially in stacked systems (with NL 2 or NL 3), but it also meets the more traditional sound expectations when it is used as a single cabinet. As model NL 1/A with an integrated 300 watts amplifier the cabinet becomes the basic part of an actively driven system.

NL 2

With two 12 inch and two 8 inch speakers this cabinet develops a sound quality that, with its outstanding dynamics, extends the expectations towards such a compact cabinet. As active version model NL 2/A is equipped with a 300 watts amplifier.

NL 3

Top-model of the NEW LINE cabinets is a completely new constructed 3-way system with a unique and smooth sound range. From deep and dry basses to clear highs the bass player can handle a variety of sounds, which stand for themselves. Also available as active (NL 3/A).

BassBall 100 NL Bassamp

Designed for young bass players is our model BB 100 NL with a power of 100 watts and the best features of the bigger models.

BassBall 200 NL Bassamp

Based on model BB 300 NL this amplifier was developed for bass players, who are - besides looking for volume power and good basic sounds -

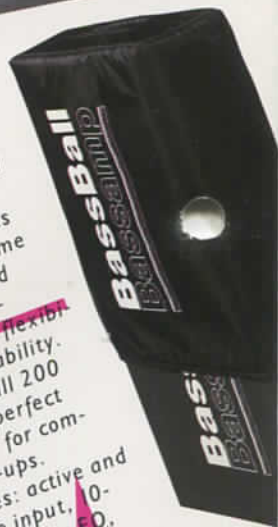

interested in flexibility and reliability.

The BassBall 200 NL is the perfect amplifier for compact set-ups.

Features: active and passive input, 0-band graphic EQ,

shape switch, EQ-cut switch, line out,

various loop-in functions, 19 inch-2 rack units, 200 watts rms at 4 ohms.

BassBall Combos

For the first time in the concepts of the construction of the BassBall Combo models opens a new variety and flexibility, which will be trendsetting. All models are designed in their upper part as a free equipable 19 inch rack with accessible rear part. The bass player can equip the different combo-models with either one of the BassBall Bassamps or with a pre-amp (ME 1) and an internally mounted 300 watts amplifier. In combination with another active cabinet (NL 1/A, NL 2/A or NL 3/A) a biamping system can be put together, which will meet any expectation.

RECOMMENDATIONS FOR COMBINATIONS

BassBall 300/3 Combo
This 3-way combo comes with a BassBall 300 Bassamp, a 15 inch, an 8 inch and a 5 inch speaker.

BassBall 200/3 Combo
Equipped like BB 300/3 Combo, but with BassBall 200 Bassamp.

BassBall 200/15 Combo
Comes with BassBall 200 Bassamp (200 watts) and one 15 inch speaker.

BassBall 100/15 Combo
Is equipped with BassBall 100 Bassamp (100 watts) and one 15 inch speaker.

BassBall 300 NL Bassamp

Besides a high volume with 300 watts and outstanding sounds this bass-amp offers a whole range of new features and facilities, which make fairly unusual set-ups and an extensive use of effects easy to handle. Features: two inputs, A/B selection, 10-band graphic EQ, shape switch, EQ cut switch, two sends, three returns, stand-by switch, active crossover 250 Hz, biamping mode, protection systems, headphone out, tuner out, fan, 300 watts rms at 4 ohms.
